When you have completed your speech:

- type out your completed speech in Japanese script [if your computer does not support Japanese script you can use a site such as google translate as a Japanese word processor –but do not be tempted to put an English speech into google translate as the output will make no sense at all!]
- cut and paste your speech into a good text-to-speech site (<http://imtranslator.net/translate-and-speak/>)
- choose a slow speed to begin with
- download the audio file to practise your pronunciation.
